OTHER INFO

Grapes were sourced from a selected plot measuring 3,11 hectares in the Leyda Valley, the well-known southern sub-region of San Antonio, 14 Kilometers from the Pacific Ocean. Cooled by the South Pacific breezes and coastal summer fog that often last until midday, the Leyda Valley climate extend the growing season, as its average summer maximum temperatures rarely exceed 25°C, ensuring slow ripening and the development of intense, fresh flavours and aromas, together with lower potential alcohol content.
